

Mobil Pegasus™ 1005 Helps GS Cadila Healthcare Limited Save US\$ 5,420 Annually

GE Jenbacher Gas Engine - Model J 320

GS Cadila Healthcare Limited

Ankleshwar, Gujarat, India

Situation

A third party gas engine oil was used to lubricate the two GE Jenbacher 1.06 MW Engines of the plant. This was causing unexpected downtime and affecting productivity as the oil needed to be changed every 2,000 hours.

Recommendation

The ExxonMobil Lube Engineer recommended **Mobil Pegasus 1005** – a high performance gas engine oil that delivers exceptional cleanliness and long-lasting protection for natural gas engine components. The performance of the gas engine and the lubricant were also closely monitored through disciplined implementation of **SignumSM Oil Analysis** program.

Result

Since the implementation of **Mobil Pegasus 1005**, the oil drain interval of the two GE Jenbacher gas engines has been extended beyond 4,000 hours, representing a 100% increment. In addition to improved productivity, the plant achieved an estimated annual cost savings of US\$ 5,420.

GE Jenbacher Gas Engine - Model J 320
