

## Mobil Delvac 1300 Super helps steel and mining company extend oil drain intervals by 50 percent\*

### Objective

Increase equipment availability by extending oil drain intervals

- Caterpillar 793 trucks : ArcelorMittal
- Quebec, Canada

### Situation

ArcelorMittal, the world's largest integrated steel and mining company, operates a number of Caterpillar 793 trucks at its iron ore mine site in Mont-Wright, Quebec, all of which use **Mobil Delvac™ 1300 Super 15W-40**. After 500 hours in use, each truck was taken off the job for routine service, including oil changes.

Because each truck being serviced was out of operation for 24 hours, the company approached the experts at Imperial Oil, an ExxonMobil subsidiary, for a lubricant solution capable of helping extend oil drain intervals and increase equipment availability.

### Solution

After proper evaluation, the technical experts at Imperial Oil put together a program that consisted of extensive used oil analysis to monitor oil drain extensions to 500, 750, 1,000 and 1,100 hours of service.

The mine's maintenance team has since elected to change oil and service trucks following consumption of approximately 95,000 liters of fuel, or between 750 and 850 hours of service.

---

# \$350,000

In company-estimated annual savings

---

## Results

After implementing used oil analysis, ArcelorMittal recognized the long-term benefits of using **Mobil Delvac 1300 Super 15W-40** heavy-duty diesel engine oil.

The company reports that **Mobil Delvac 1300 Super 15W-40** has helped extend oil drain intervals by more than 50 percent, increasing equipment availability and reducing overall maintenance costs. Together, these benefits have helped generate a company-estimated annual savings of US \$350,000.

# 50%

## Extension in oil drain intervals

### Benefits of Mobil Delvac 1300 Super

Superior soot-viscosity control

Outstanding thermal and oxidative stability

Excellent oil consumption control

Excellent low temperature pumpability

### Advancing productivity

Our lubrication solutions - high performance lubricants backed by application expertise and services - are designed to help you get the most out of your operations.

### Safety

Long oil and equipment life, as well as powerful wear protection, can help reduce maintenance and the risks associated with employee-equipment interaction.

### Environmental care\*\*

Longer oil and equipment life can help reduce oil consumption and waste disposal.

### Productivity

Mobil Delvac 1300 Super can help increase equipment in-service time, increasing productivity without compromising the protection of engines operating in demanding applications.
